

A Mark of Assurance  
in Seed Treatments

You choose a seed treatment package to help ensure a successful season. In turn, you should feel assured that those seed treatments perform as expected and work well with the genetics you're planting. LumiGEN® seed treatments are exclusive to the seed brands of Corteva Agriscience™, and represent the high performing, industry leading seed applied technologies that are available on Brevant® seeds genetics.

### Exclusive to Corteva Agriscience

LumiGEN seed treatments are designed, verified and proven to work with Brevant seeds genetics, helping farmers establish healthy, uniform crops and maximize productivity.

Designed for our genetics

Verified on our genetics

Proven in the field with our genetics

### A Mark of Assurance in Seed Treatments

LumiGEN seed treatments are extensively tested across multiple years, geographies, and environments. LumiGEN seed treatments are selected and verified through our rigorous PASSER testing process that evaluates in 6 key areas: **Plantability, Application, Seed Safety, Stewardship, Efficacy, and Regulatory.** As a result, LumiGEN has become a trusted mark of assurance in seed treatments.

Look for the LumiGEN logo on your seed tag, and feel assured that you are using proven, industry-leading seed treatments that have been designed for your seed genetics.

The LumiGEN canola seed treatment portfolio provides proven, industry-leading protection from diseases and insects in canola. Brevant seeds **foundation canola seed treatment package** includes our premium fungicide and insecticide packages.

Premium Insecticide and Fungicide Package		
Product	Group	Disease and Insect Protection
Lumiderm™	28	<ul style="list-style-type: none"> <li>Enhanced crucifer and striped flea beetle protection</li> <li>Excellent early season cutworm control</li> <li>Exceptional early season seedling stand establishment, vigour and biomass</li> <li>Up to 35 days of protection through critical early stages</li> </ul>
Thiamethoxam	4	<ul style="list-style-type: none"> <li>Early season flea beetle protection</li> </ul>
<b>NEW</b> Lumiscend™	7	<ul style="list-style-type: none"> <li>A unique new active ingredient for powerful airborne blackleg protection</li> <li>Seed decay/pre-emergence damping-off, post-emergence damping-off, seedling blight and root rot</li> </ul>
Ipconazole Picoxystrobin Metalaxyl	3, 4, 11	<ul style="list-style-type: none"> <li>Seed and soil-borne blackleg</li> <li>Seed-borne alternaria</li> <li>Seed and seedling diseases: damping-off, seedling blight, seed rot, root rot caused by Rhizoctonia, Fusarium and Pythium spp.</li> </ul>

## Lumiderm™

### INSECTICIDE SEED TREATMENT

Lumiderm™ insecticide seed treatment provides excellent plant protection against both flea beetles and cutworms in one convenient bag.

#### Key benefits

- Enhanced crucifer and striped flea beetle protection
- Excellent control of early season cutworms
- Excellent early season seedling stand establishment, vigour and biomass
- Up to 35 days of protection through the critical stages of seedling growth
- Group 28 chemistry provides an additional mode of effective action for flea beetle and cutworm control

#### See the Lumiderm difference in flea beetle protection

Lumiderm protects canola from cutworm feeding for up to 35 days.  
Source: Lumsden, SK 22 Days After Seeding

#### Lumiderm Results

**+1.4** BU/AC  
Shown in 137 grower demo trials

**-35%** FLEA BEETLE DAMAGE  
Shown in 192 R&D and grower demo trials

### NEW

## Lumiscend™

### FUNGICIDE SEED TREATMENT

New Lumiscend™ fungicide seed treatment adds powerful airborne blackleg protection to the new LumiGEN® canola disease package.

#### Key benefits

- A component of the NEW LumiGEN canola disease package is Lumiscend™ fungicide seed treatment, a unique new active ingredient for powerful airborne blackleg protection
- The New LumiGEN canola fungicide seed treatment contains four effective active ingredients for industry leading, broad spectrum disease protection

## Lumisena™

### FUNGICIDE SEED TREATMENT

Lumisena™ fungicide seed treatment provides the best protection against phytophthora for healthier, more vigorous soybean stands and higher yield potential.

#### Protection against phytophthora

- Lumisena is the most advanced seed applied technology to protect against phytophthora
- It is the only seed applied technology that delivers residual protection across multiple stages of the phytophthora pathogen's life cycle: preventative, eradivative, curative and antisporeulant
- Lumisena is a group 49, a new class of chemistry for superior disease protection.

#### More vigorous growth and enhanced emergence

- Lumisena enhances emergence, vigour and root growth, improving soybean stands and maximizing yield potential.

#### Lumisena Yield Advantage

**+3.0** BU/AC

In demo trials compared to competitor FST treatment

## Lumiderm™

### INSECTICIDE SEED TREATMENT

Lumiderm™ insecticide seed treatment provides broad spectrum protection from early season insect pests including bean leaf beetle, soybean aphid and now registered for cutworms.

#### Excellent Seedling Protection

- Lumiderm provides soybean seedlings with extended protection against soybean aphid, bean leaf beetle, seedcorn maggot, European chafer, Japanese beetles, white grub, wireworm, and cutworm
- This protection delivers a uniform, healthy stand that maximizes yield potential

#### Lumiderm + Lumisena Yield Advantage

**+1.5** BU/AC

In demo trials compared to standard IST + FST treatment.

**Lumiderm complements Lumisena fungicide seed treatment and completes the LumiGEN soybean package. Add Lumiderm to maximize your soybean protection.**

Lumiderm Target Pest:  
Bean Leaf Beetle  
Ontario Soybean Plot Site

FST = Fungicide Seed Treatment  
IST = Insecticide Seed Treatment

FST only

Standard IST + FST

Lumiderm + Lumisena + FST
